Ideal for quickly cutting through all types of submerged and emergent aquatic weeds, this handy aquatic weed cutting mower can be used in lakes, dams, lagoons and more.

LAKE MOWER SPECIFICATIONS

Powered for up to 7 hours on a single charge*, this aquatic harvester features adjustable cutting depth to fit your body of water. Cutting in depths of up to 1 meter standard and with an optional 60cm-1.2m extenders available, this lightweight aqua mower is crafted to make short work of removing even the most difficult aquatic weeds.

Weighing at just 23.2 kgs this stainless steel and aluminium construction is strong, featuring self-sharpening blades. Fit this beauty to the side, front or rear of practically any small boat.

This lake mower operates with a simple and safe on/off switch that's built-in and easily adjustable for height. Custom bearing blocks give you the smooth operation you want, whilst its low-power consumption motor works with high efficiency, with a compact drive system. For heavy-duty work and getting rid of infestations of Cumbungi, Lily Pads, submerged aquatic weeds and much more. This robust lake mower is a must-have for serious aquatic weed removal.

**When used with a 120 amp hour deep cycle battery, not included.*
