

PRODUCT:

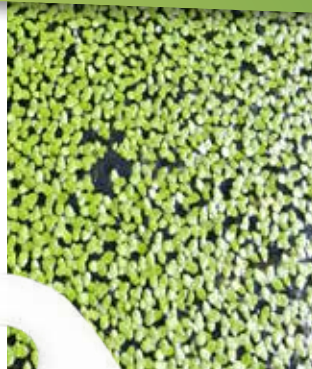

FREE FLOATING WEED PREVENTATIVE

TARGET: **FREE-FLOATING AQUATIC WEEDS**

AQUATIC TECHNOLOGIES

The Aquatic Weed Control Experts

Duckweed

Salvinia

Azolla

For the safe and effective prevention of free floating weed infestations such as Salvinia, Duckweed and Azolla in ponds, dams, lagoons and lakes.

FREE FLOATING WEED PREVENTATIVE

- Prevents new aquatic weed infestations
- Lines the surface of the water with a thin silicone barrier
- Fast-acting effects
- Lasts between 4-6 weeks

This preventative solution helps to limit the risk of new aquatic weed infestations in your water. Helping to prevent the regrowth of Azolla, Salvinia, and Duckweed, this silicone-based liquid disperses across the water surface to give fast-acting effects.

Once you've cleared your body of water from aquatic weeds, Free Floating Weed Preventative helps to reduce the likelihood of re-infestation.

SAFE FOR

Swimming, Irrigation, Stock, Fish & Pets.

Helping to prevent the regrowth of Azolla, Salvinia, and Duckweed, this silicone-based liquid disperses across the water's surface to give fast-acting effects.

HOW CAN I CONTROL FREE-FLOATING AQUATIC WEEDS?

Free-floating aquatic weeds like Duckweed, Lemna, Azolla and especially Salvinia can be hard to get rid of. They grow rapidly in large numbers, so controlling them requires some added effort.

Affecting the surface tension of water by creating a silicone 'barrier', this pourable solution prevents the re-occurrence of new floating weed growth by stopping it from floating - providing the peace of mind you need in ensuring your water stays as weed-free as possible.

Free Floating Weed Preventative works perfectly in conjunction with *Free Floating Weed Control* and approved herbicides that aim to clear the water's surface of weeds.

The Aquatic Weed Control Experts

Free Floating Weed Preventative

Application Rates:

Where To Use	How Much To Use	How To Apply	When To Apply
Large Pond, Dams and Lagoons	100mL per 100m ² of water surface area.	Pour directly from the container into the water body to be treated.	Apply every 4-6 weeks, or as required.

For Best Results:

When used in conjunction with Free Floating Weed Control. Apply Free Floating Weed Preventative 2 hours after you have applied Free Floating Weed Control.

When applying after the application of approved herbicides, apply Free Floating Weed Preventative 4 days afterwards at a rate of 100mL per 100m² of water surface area.
