- 3.0m high
- 10.7m wide

These long-lasting and reliable US-made display aerator water fountains are crafted from high-strength composite materials. These high-performance aerators don't just give you that next-level visual appeal - they're incredibly effective in keeping your water quality healthy for longer, too.

These medium-sized aerator fountains have been engineered for minimal motor stress for long-term use. High spray patterns give you some spectacular visual displays for years and years to come. All this and more, with low power consumption to enable you to save energy.

The 2HP Select Series by Aqua Control features a wide range of spray patterns fit for various sizes and shapes of ponds, dams and lakes. Perfect for both deep and shallow water, these aerator fountains are easy to operate under any conditions and feature a motor configuration for simple control.

Super Jimmy
