AQUATIC BLUE ECO FOR VIBRANT WATER COLOUR

BENEFITS OF AQUATIC BLUE ECO

Aquatic Blue Eco is a highly concentrated blend of colourants to colour lakes, ponds, dams, fountains, water features and other water bodies, with a vibrant natural blue look, that is aesthetically pleasing.

Aquatic Blue Eco is formulated with dispersants which cause the dye to be distributed uniformly throughout the water body, therefore the colour is deeper, the effect occurs much quicker and the longevity is enhanced. Reactants in Aquatic Blue Eco keeps the colour in suspension and prevents the dye particles from sinking to the bottom of the water body, resulting in increased depth of colour and longevity.

COMPATIBLE: Aquatic Blue is compatible with chelated copper algaecides, such as Coptrol and most other chemicals used in the aquatic environment.

SUITABLE FOR

				
Fish Pond	Small Pond	Large Pond	Small Dam	Large Dam
0 - 15,000L 0 - 20m ²		15,000L - 50,000L 0 - 50m ²	50,000L - 1ML 50m ² - 2,000m ²	1ML - 10ML 2,000m ² - 10,000m ²

The Water Treatment Experts

Aquatic Blue Eco

Application Rates:

	Where to Use	How Much to Use	How to Apply	How Often to Apply
Colourant - to improve the appearance of water bodies	Ponds with a maximum depth of 1m	1mL per 2,000L of water to be treated	For quick application, simply pour directly into the water.	Apply every 4-6 months
	Dams and Lakes	1L per 800,000L of water to be treated	For best results, dilute 1-part Aquatic Blue Eco to 10-parts water and spray evenly around the water's surface.
