## Light Set Installation

### Step #1

Fasten mooring rope to the large holes on two opposing sides of the float. Make sure to place the knot on the bottom side of the float as to not interfere with the light bracket.

### Step #2

Mount the optional light bracket to the float making sure that the power cable is away from the float. Place bracket in the corner using the provided hardware in the two outer holes as shown. Bracket will contour over the mooring rope.

### Step #3

For the 1hp or 2hp unit, plug the light set cord into the power outlet.
