

AQUATIC TECHNOLOGIES

The Water Treatment Experts

PRODUCT: AQUATIC CLEAR DROP-FLOC BLOCK

TARGET: MURKY WATER

Compact and easy to use, just place it in a position of free flowing water tethered within the mesh bag provided.

Great for remote locations, such as storm drains, construction sites, waste water, mining, industrial applications & more.

WHY CHOOSE A FLOC BLOCK?

Aquatic Clear Drop Floc Blocks have been used successfully to clarify murky water on construction sites to mining dams, ponds to irrigation water bodies and more.

Perfect for those difficult-to-reach areas and remote areas such as storm water drains and irrigation dams, these blocks make even the trickiest areas easy to clarify remotely.

- Clears murky water
- Fast-acting
- Great for storm situations
- Will not affect pH or salinity
- One block will treat up to 300,000L of flowing water

SAFE FOR

Drinking Water, Irrigation, Fish, Aquatic Plants, Wildlife & The Environment.

This easy-to-use product is made for clearing up murky water in culverts, waste water streams, industrial applications & more!

HOW IT WORKS

As water passes around the block, its particles dissolve and attach to organic matter. This makes sediment settle onto the bottom, making your water clearer.

Flocculant products work by assisting the removal of organic matter and microscopic organisms from water - these are what make your water murky, to begin with.

Aquatic Floc Block, will gather the molecules that are polluting the water and generally clear the stream and flush the water downhill over time.

SUITABLE FOR ANY FLOWING WATER:

- Waste-water streams
- Construction sites
- Mining dams
- Storm water drains
- Irrigation dams

Treats:

300,000L water

3kg Block

The Water Treatment Experts

Aquatic Clear Drop Flocculant Block

Application Rates:

Where To Use	How Much To Use	How To Apply	When To Use
Dams and Ponds	One block treats approximately 300,000L of water.	Place close to entry point of running water.	As required.

For Best Results: Aquatic Clear Drop Floc Block

Place close to source of flowing water.

Use with Aquatic Clear Drop-Flocculant Block Mesh Bag to tether into a suitable position.

**Always read the product label for directions.*
