

# PRODUCT: **ULTIMATE FISH POND PACK**

TARGET: **ALGAE**

*Precision in Action: Takes on scum build up along pond edges*

*A Fresh Start: Bid farewell to decaying organic matter from rocks and waterfalls*

*Environmentally-safe: Fish-friendly with its non-toxic composition*

## **Discover a comprehensive Eco-Friendly Solution for Maintaining a Pristine Pond Environment – Safe for Fish!**

### **YOUR SOLUTION FOR A CRYSTAL CLEAR POND**

- Help control existing algae and cleanse rocks, waterfalls, and streams by treating dead organic matter
- A fish safe option, when used according to instructions, with its non-toxic composition
- Improve water quality by introducing beneficial bacteria into your water body
- Suppress algae for up to 6 months with 100% natural Australian grown Barley<sup>1</sup>

### **OUR ULTIMATE PACK IS DESIGNED TO BE YOUR ONE-STOP SHOP FOR WATER QUALITY MAINTENANCE IN FISH PONDS**

Our Ultimate Fish Pond Pack is simple to apply and avoids the use of harsh chemicals. Experience the transformative power of our Ultimate Fish Pond Pack, and witness the improvement in your water body's health and clarity. Naturally restore the balance to your pond's ecosystem and foster a sustainable environment for aquatic life<sup>2</sup>.

#### **SAFE FOR**

Fish, Pets, Aquatic Plants, Wildlife & The Environment.

#### **BUY ONLINE**

##### **Small Ponds**

900g GreenClear Pond  
(treats up to 15m<sup>2</sup>)  
250g Waterbac  
100g Barley Straw Bale

##### **Large Ponds**

4.5kg GreenClear Pond  
(treats up to 30m<sup>2</sup>)  
250g Waterbac  
200g Barley Straw Bales

**AQUATIC TECHNOLOGIES**

# The Ultimate Pack targets Green filamentous algae (string algae), green slime, decaying organic matter, excess nitrogen and phosphorous.

## To achieve the best outcomes, follow these simple instructions:

- 1. Help control existing algae:** Use GreenClear Pond to help control existing algae problems. Turn off pumps and waterfalls to prevent any outflow from the pond during application, and clear excess debris. Use one quarter of a cup for every 5m<sup>2</sup>, and apply no more than once per week.
- 2. Remove excess nutrients:** Apply Aquatic Waterbac after your existing algae has been controlled. For larger ponds, 250g of waterbac will cover 25m<sup>2</sup> of water surface area. Apply every 2 weeks until the water becomes clear. For maintenance, apply half the initial dose once per month.
- 2. Suppress Algae:** Slow algae growth and green slime with our long lasting Barley Straw Bale. Simply place the net bag into the water and allow to float close to the water's surface. 100g treats up to 2m<sup>2</sup> in surface area and lasts up to 6 months.

### SUITABLE FOR

Bird Baths

Rock Edges

Water Features

Fountains

Waterfalls

## The Pond Treatment Experts

### GreenClear Pond

### Application Rates:

Where to	How Much To Use	How to Apply	When To Apply
Closed fish ponds and ponds, rocks, waterfalls, fountains and birdbaths	One quarter cup for every 5m <sup>2</sup> or 1,890L. <i>*1 quarter scoop included.</i>  900g treats 74m <sup>2</sup> . 4.5kg treats 333m <sup>2</sup> .	Apply directly to the affected area. For persistent problems, double the dose and scrub with a coarse brush.	During periods of increased algae growth.  No more than once per week.

**For best results:** Remove excess debris and free-floating algae from ponds.

Use in rotating treatments with Aquatic Waterbac to maintain a healthy pond year-round.

**Safety Instructions:** Wear safety gloves and eye protection when handling this product. Always follow label directions.

*\*Always read the product label for directions.*
