# HOW TO USE: AQUATIC BLUE *to* Improve your water body

Aquatic Blue filters the sun's rays, reducing the amount of UV present in the water. This can be beneficial for increased oxygen saturation, which in turn can help keep your fish healthy for longer<sup>2</sup> and support the growth of 'good' bacteria. It is formulated to disperse evenly for a beautiful blue hue that's consistent throughout your water body. It's safe to use around fish, livestock and pets.

## APPLICATION RATES:

AQUATIC TECHNOLOGIES		The Algae Treatment Experts		
Aquatic Blue		Application Rates:		
	Where to Use	How Much To Use	How to Apply	How Often to Apply
Improve water body health and reduce UV light	<b>Ponds with a maximum depth of 1m</b>	7.5mL of Aquatic Blue per 1,000L of water.	For quick application, simply pour directly into the water. For best results, dilute 1-part Aquatic Blue to 10-parts water and spray evenly around the water surface.	Apply every 4-6 months
	<b>Dams and Lakes</b>	5L of Aquatic Blue per 2ML of water		

*\*Always read the product label for directions.*
