7.5HP SELECT SERIES II

BENEFITS

Increases oxygen in water

Greatly reduces the likelihood of algae blooms

Promotes good fish health

Keeps water clearer

Aesthetically pleasing

Improves overall health of water body

These long-lasting and reliable US-made display aerator water fountains are crafted from high-strength composite materials. These high-performance aerators don't just give you that next-level visual appeal - they're incredibly effective in keeping your water quality healthy for longer, too.

These extra large-sized aerator fountains have been engineered for minimal motor stress for long-term use. High or wide spray patterns give you some spectacular visual displays for years and years to come. All this and more, with low power consumption to enable you to save energy.

The 7.5HP Select Series features a wide range of spray patterns fit for various sizes and shapes of dams and lakes. Perfect for both deep and shallow water, these aerator fountains are easy to operate under any conditions and feature a full commercial grade control panel with both light and pump motor timers.
