SECTION 4 – FIRST AID MEASURES

Scheduled Poisons: Poisons Information Centre in each Australian State capital city or in Christchurch, New Zealand can provide additional assistance for scheduled poisons. (Phone Australia 131126 or New Zealand 0800 764 766).

First Aid Facilities: Ensure there is access to eye washes and safety showers.

Inhalation: Move victim to fresh air. Obtain medical attention if symptoms occur.

Skin Contact: Wash skin with plenty of water. Seek medical advice (e.g. doctor) if irritation persists for more than 30 minutes.

Eye Contact: If product gets in eyes, wash material from them with running water for 15 minutes, ensuring eyelids are held open. If irritation persists, seek medical advice.

Ingestion: Do NOT induce vomiting. Dilute by drinking water or milk. If vomiting occurs spontaneously, administer more liquids and keep head below hips to prevent aspiration of liquid into the lungs. Never give fluids or induce vomiting if patient is unconscious. Seek medical advice.

Advice to Doctor: Treat symptomatically. Observe signs of sensitisation and treat appropriately if evident.

Personal Precautions:	<ul style="list-style-type: none">Avoid contact with skin and eyes
Environmental Precautions:	<ul style="list-style-type: none">Do not allow product to enter sewers
Clean up methods:	Small spill – soak up with absorbent material and transfer into suitable container Large spill – wear appropriate PPE. Contain spill and pump into suitable disposal container. If spillage enters waterways, notify appropriate government agencies. Flush and scrub area with detergent and remove residue to prevent slipperiness.
Waste Disposal:	If disposed as shipped is not hazardous waste as specified in 40 CFR 261. Consult state and local officials for proper disposal methods. Observe all local, state and federal regulations.

SECTION 7 – HANDLING AND STORAGE

Handling:	Handle with due care and avoid personal contact. Since emptied containers retain product residues (vapours, liquid and/or solids), all hazard precautions given in this SDS must be observed.
Storage:	Store at normal temperatures and conditions of warehousing. Keep container closed when not in use. Avoid allowing product to freeze.

SECTION 8 – EXPOSURE CONTROLS AND PERSONAL PROTECTION**PERSONAL PROTECTION EQUIPMENT (PPE)**

Ventilation:		Local ventilation recommended

Reactivity:	Stable at normal temperatures and pressure.
Chemical Stability:	Stable under normal ambient and anticipated storage and handling conditions of temperature and pressure.
Conditions to Avoid:	Avoid contact with heat or heat sources. Acids.
Incompatibilities:	ACIDS: reaction can occur, yielding heat and pressure which can burst an enclosed container. Attacks many reactive metals (aluminium/magnesium/zinc alloys) releasing highly flammable gas (hydrogen) which generates fire or explosion hazards. Reacts slowly with ambient air (particularly carbon dioxide) which may cause certain insoluble salts to form in solutions.
Hazardous Decomposition Products:	Product can decompose on combustion to form Carbon Monoxide, Carbon Dioxide, and other possibly toxic gases and vapours. Acids (especially hydrochloric acid); will generate toxic gas.
