HOW TO USE: AQUARIUM STRENGTH AQUATIC BARLEY STRAW EXTRACT

Aquatic Barley Straw Extract Aquarium Strength gives the user the desired result.

This extract is perfect to use immediately after an aquarium clean or re-fill, to help maintain clean water.

Just pour the recommended amount straight into your fish bowl, fish tank or aquarium. Totally safe to use around fish and aquatic plants, this handy extract lets you achieve that crystal clear water and keep your fish happy and healthy for longer.

Container Size	Water Volume
50mL	500L
250mL	2,500L
500mL	5,000L
1L	10,000L

APPLICATION RATES:

The Algae Treatment Experts

Aquarium Strength Barley Straw Extract

Application Rates:

Where to Apply	How Much to Use	How to Apply	How Often to Apply
Indoor Fish Tanks and Aquariums	5mL product per 50L of water.	Gently shake container to mix. Measure the required amount of product & pour directly into the water.	Apply every two weeks.

For Best Results:

Use immediately after your regular water change/tank clean.

For water with high turbidity, or poor water clarity, apply an additional 20% more product until clarity improves.

**Always read the product label for directions.*
