

AQUATIC TECHNOLOGIES

The Water Treatment Experts

PRODUCT: **PHOSLOCK**

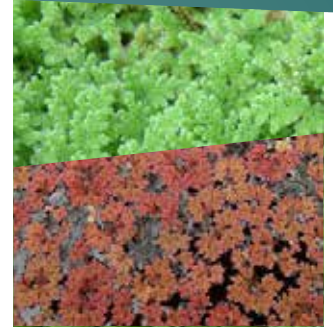

TARGET: **PONDS, DAMS & LAKES**

Improves water quality

Algae

Azolla

Phoslock is a unique product that can aid in removing excess phosphorus from your water body.

PHOSLOCK FOR PHOSPHORUS

- Can reduce total phosphorus to aid in water body management
- Unmatched technology for phosphorus removal
- Improves water quality
- Permanently removes free reactive phosphorus at the time of application

Developed by the Australian CSIRO, Phoslock is a highly effective product that removes excess phosphorus from your body of water.

Phosphorus is a dominant food source for both algae and aquatic plants and if left untreated, high levels of

phosphorus can lead to toxic algal blooms or excessive growth of aquatic plants such as Azolla.

Phoslock is a unique modified bentonite clay granule that effectively locks free phosphorus into its own particles, which then sink to the bottom and become part of the natural sediment.

SAFE FOR

Drinking Water, Swimming, Irrigation, Stock, Fish, Aquatic Plants & Pets.

HOW TO USE: PHOSLOCK

One Phoslock application can last for years to come, keeping you free of phosphorus.

Phoslock can assist in the removal of nutrients caused by fish waste or where fish stocks are high.

Phoslock can be applied after aquatic algacides or herbicides have been used and may assist in improving water quality and reduce nutrients.

SUITABLE FOR

Large Pond

15,000L - 50,000L
0 - 50m²

Small Dam

50,000L - 1ML
50m² - 2,000m²

Large Dam

1ML - 10ML
2,000m² - 10,000m²

Lagoon

Lake

10ML+
10,000m²+

APPLICATION RATES:

The Water Treatment Experts

Phoslock

Application Rates:

Where To Use	How Much To Use	How To Apply	When To Use
Ponds, Dams and Lakes	25kg per 100m ² of water surface area.	Mix into an aqueous slurry and apply evenly over water surface OR Spread granules evenly across water surface.	Once or as required.

For Best Results:

Add aeration to your water body for a more effective and long-term treatment.

**Always read the product label for directions.*
