AQUATIC TECHNOLOGIES

The Water Treatment Experts

PRODUCT: AQUATAIN AMF

TARGET: MOSQUITO PREVENTION

Stagnant pooling water

Easy to apply

Safe to use

Be mosquito free this breeding season with Aquatain AMF! Simply apply to your pond, dam or lake to kill larvae and prevent mosquitoes from returning!

This non-toxic product creates a thin layer on the surface of ponds, dams, lakes and more that disrupts the mosquito life-cycle by targeting the early stages of growth. Perfect to be used on any body of water where mosquitoes breed, Aquatain AMF works effectively via a physical reaction - not a chemical one.

AQUATAIN AMF

- **Prevents adult mosquitoes from laying eggs**
- **Mosquito pupae die within two hours**
- **Mosquito larvae die within two days**
- **Easy to apply**

SAFE FOR

Drinking Water, Stock, Fish, Aquatic Plants & Pets.

Controls mosquitoes simply by applying Aquatain AMF once a month.

HOW DOES IT WORK?

Aquatain AMF works by creating a silicone-based liquid barrier which spreads across the water's surface. This liquid layer kills existing mosquito larvae and pupae and prevents adult mosquitoes from laying their eggs.

Film spreads over water's surface.

Use for pooling water anywhere.

Prevents larvae breeding in water.

SUITABLE FOR

The Water Treatment Experts

Aquatain Mosquito Killer — Application Rates:

Where To Use	How Much To Use	How To Apply	When To Use
Water tanks, pot plants, guttering, pit drains, ponds and dams	1mL per m^2 of water surface area.	Pour measured amount directly into water body.	Every four weeks.

For Best Results:

Shake vigorously before use.

Apply first application just before mosquito breeding season.

**Always read the product label for directions.*
